Subject: Colloidal dioxin sampling results - June 2015

Stephen/Mark,

Based on recent discussion and concerns voiced over colloidal dioxin transport from fracture flow to the mouth of New Cricket Spring, we again collected dioxin samples at the mouth of the spring and at the discharge collection point from the treatment system at the Arkwood Site in June 2015. The summary report of analysis is attached for your information and use. If you have any questions, please let me know.

Best Regards,

Jim
